Here we have a very well preserved example of the famous D.W. Brunton's pocket transit. Made by Wm. Ainsworth & Sons of Denver Colorado. The case is aluminum. Cover contains a fine mirror with center line and a hinged brass peep sight. Compass ring graduated to degrees, numbered in quadrants. Case is roughly 2 7/8" by 2 7/8" by 1". Compass needle is about 2 1/4" long with a jeweled center. Clinometer arc graduated to degrees, reading by vernier on clinometer arm to 5 minutes. Clinometer arm has spirit level with good bubble. Entire unit is in fine shape and working. A minor amount of scuffing to the outer case says it has seen a bit of field use but no abuse. Questions welcomed. Buyer pays actual shipping and insurance.

Questions from other buyers

Q: Hello. I have a couple ?'s. 1. The sight arm in the picture appears to be curved or bent. Am I seeing things? Perhaps a side view pic is in order. 2....[more](#)

answered on: Feb-17-05

A: The sight arm does have a curve to it. Hinges are tight. Top closes tight but the sight arm due to the curve can't be enclosed. The mirror is 99% good....[more](#)
